FRANCAIS NOTICE D'INSTRUCTIONS ET995 (V12) – 10/2021

CARDIONYL® CE0459

SUTURE CHIRURGICALE NON RESORBABLE, MONOFIL DE POLYAMIDE

DESCRIPTION

Les sutures chirurgicales stériles non résorbables CARDIONYL® sont composées d'un monofil de polyamide, montées ou non avec des PLEDGETS de dimensions diverses.

CARDIONYL® est disponible en fil en bleu (FD&C bleu n°2 CFR 741102).

Les sutures CARDIONYL® satisfont à toutes les exigences de la Pharmacopée Américaine (USP) et de la Pharmacopée Européenne (EP), relatives aux fils non résorbables.

Les sutures CARDIONYL® provoquent au sein des tissus une réaction inflammatoire modérée caractérisée par l'encapsulation graduelle de la suture par le tissu conjonctif fibroïde.

Comme pour toutes sutures en polyamide, bien que non résorbables, elles peuvent faire partie de leur solubilité sur une longue période in vivo.

Les sutures chirurgicales stériles non résorbables CARDIONYL® sont disponibles en plusieurs longueurs, diamètres (USP/EP) et quantités avec aiguille chirurgicale.

Centaines de complications peuvent résulter de la technique chirurgicale elle-même.

VALIDITE / CONDITIONS DE STOCKAGE

Ne pas utiliser après la date de péremption.

Ce dispositif doit être conservé dans son emballage d'origine, à une température inférieure à 40°C, dans un endroit sec et à l'abri de la lumière.

SYMBOLES UTILISES SUR L'EMBALLAGE

= PLEDGET
MD = Dispositivo Médico
UDI = Identificador único de dispositivo

= Ne pas réutiliser
= Ne pas restériliser

= Date limite d'utilisation (AAAA-MM-JJ)

= Date de fabrication (AAAA-MM-JJ)

= Fabricant

= Code de lot

= Ne pas utiliser si l'emballage est endommagé

= Conserver à l'abri de la lumière du soleil

= Craint l'humidité

= Limite supérieure de température

= Stérilisé avec de l'oxyde d'éthylène

= Système de barrière stérile unique

= Référence catalogue

= Attention

= Consulter les instructions d'utilisation

= Marquage CE, produit conforme aux exigences essentielles de la directive européenne 93/42/EEC relative aux dispositifs médicaux

Tous les événements indésirables graves ou menaçant la vie, ou entraînant la mort, liés à l'utilisation de ce dispositif, doivent être signalés au fabricant.

Marquage CE initial : 996

UTILISATION

Vérifier l'intégrité de l'emballage garantissant la stérilité du dispositif médical.

Comme pour tout matériel de suture, la sécurité des nœuds doit être assurée selon les circonstances chirurgicales et l'expérience du chirurgien. L'emploi de nœuds additionnels peut être particulièrement approprié avec les monofil.

Les utilisateurs doivent être familiarisés avec les techniques chirurgicales pour les sutures non résorbables avant d'utiliser CARDIONYL®. En effet, le risque de déchirure de la plaie peut être variable selon le site d'application et le matériel de suture utilisé.

Une pratique chirurgicale convenable doit être respectée en ce qui concerne le drainage et la fermeture des plaies contaminées ou infectées.

Ce produit ne pourra être utilisé que par ou sous les ordres d'un médecin.

Marquage CE initial : 996

VALIDITY / STORAGE CONDITIONS

Ne pas utiliser après la date de péremption.

Recommandations: must be stored in the original packaging, below 40°C, in a dry place, away from light.

SYMBOLS USED ON LABELLING

= PLEDGET

MD = Dispositivo Médico

UDI = Identificador único de dispositivo

= Do not reuse

= Do not resterilize

= Use by date (YYYY-MM-DD)

= Date of manufacture (YYYY-MM-DD)

= Manufacturer

= Batch code

= Do not use if package is damaged

= Keep away from sunlight

= Keep dry

= Upper temperature limit

= STERILE EO = Sterilized using ethylene oxide

= Single sterile barrier system

= Catalogue number

= Caution

= Consult instructions for use

= (for USA): CAUTION: US Federal Law restricts this device to prescription only.

= CE Mark: Product conforms to the essential requirements of the European Medical Devices Directive 93/42/EEC

All serious or life-threatening adverse events or deaths associated with use of this device should be reported to the manufacturer.

USE

Inspect the packaging to confirm its integrity before opening.

As a sterile material, the handling (tools safety), methods and associated practices must be adopted by the physician according to the clinical context and his experience to ensure patient's safety. Additional knots should be considered with monofilament thread.

Acceptable surgical practice should be followed with respect to drainage and closure of contaminated or infected wounds.

This product can be used only by or on the order of a physician.

Any device which has been used or partially must be destroyed in proper incinerator in accordance with the local or national regulations concerning disposal of hospital waste.

ADVERSE EVENTS

Side effects associated with the use of this medical device include:

- wound dehiscence,

- calculi formation in urinary or biliary tractus when prolonged contact with salt solutions occurs.

Users should be familiar with surgical and techniques involving synthetic non-absorbable sutures, as risk of wound dehiscence may vary with the site of application and the suture material used.

Acceptable surgical practice should be followed with respect to drainage and closure of contaminated or infected wounds.

This product can be used only by or on the order of a physician.

Any device which has been used or partially must be destroyed in proper incinerator in accordance with the local or national regulations concerning disposal of hospital waste.
